Subject: Keith Leffler's comments

Dear attorneys, Its the first time i have ever emailed the attorney general's office but to do it twice is quite unbelievable for me but i sincerely hope the attorney generals office doesn 't make the mistake of settling for this one billion dollar thing with microsoft's support for disadvantaged schools with computer hardware and microsoft software. I can't understand the logic behind this. Mr. Keith Leffler's comments that "The world is moving toward PCs, away from Apple. It has nothing to do with us," demonstrates how ignorant he is about what is really at stake or what is his real reason is for recommending this ? I suggest you ask him to declare how much microsoft stock he or his family or friends have hiding or how much money he is making from a undisclosed microsoft retainership. I had my reservations about the politics but i am more suspicious than ever this is a political thing and I appreciate the need to focus on terrorists but this is really going to far and over the long run detrimental to united states technology and economic infrastructure. go for the quick fix in a complicated case?? i think you guys are smarter than that. Think about it. Microsoft is cannot be the only choice in our future. Please consider my views. Chappy Liu.
